BRAIN RESEARCH AND INTERVENTIONAL
NEUROTHERAPEUTICS (BRaIN) PROGRAM

Thank you for contacting the **Brain Research and Interventional Neurotherapeutics (BRaIN) Program at Butler Hospital**. Our clinical service offers a suite of interventional psychiatry services aimed at supporting your patients when first-line approaches may not be successful. Insurance company policies for these treatments have various eligibility requirements for coverage. We must collect and review detailed information about a patient's medical history and past treatment history to determine their eligibility and medical appropriateness.

I am referring my patient for:

- ☐ TMS Therapy
- ☐ Esketamine (Spravato)
- ☐ Outpatient Electroconvulsive Therapy (ECT)
- ☐ PRISM Therapy
- ☐ ProLivRx (take-home, prescription device)
- ☐ Vagus Nerve Stimulation (VNS)
- ☐ I'd like the Butler provider to evaluate my patient and recommend which treatment might be best

Transcranial Magnetic Stimulation (TMS)

Inclusion: Primary Diagnosis of MDD; moderate to severe, without psychotic features covered by all insurance companies for adults and adolescents (15 YO and older) or OCD for select insurers

Exclusion: Non-removal metal in head (except dental), epilepsy, seizure disorder, severe brain injury/trauma, stroke, brain tumor

Esketamine (Spravato)

Inclusion: Primary Diagnosis of MDD; moderate to severe, without psychotic features

Exclusion: Aneurysmal vascular disease, active substance use disorder (unless in remission > one month), uncontrolled hypertension

PRISM Therapy Inclusion: Diagnosis of PTSD or Clinical Research Trial for MDD with Anhedonia

Outpatient Electroconvulsive Therapy (ECT)

Inclusion: MDD, Bipolar Disorder, Schizophrenia/Schizoaffective, Catatonia, Psychotic Depression

Exclusion: Unstable cardiac disease, uncontrolled hypertension, pregnant, obesity with concurrent medical issues

ProLivRx (take-home, prescription device)

Inclusion: MDD, without psychotic features, ability to operate a smartphone application

Exclusion: Unstable neurological conditions

Vagus Nerve Stimulation (VNS)

Inclusion: MDD, 18 YO and older, failure of >4 medication trials or other interventional treatments

Exclusion: Surgical/anesthesia risk, unmanaged cardiac disease, uncontrolled pulmonary disease, current SI
