

MEMORY SUNDAY

A designated Sunday that provides education on Alzheimer's: prevention, treatment, research, and caregiving.

Please join us for a conversation on understanding aging and dementia, managing memory, strategies for prevention, tools for your brain health, and care for the caregiver. The purpose of the event is to bring national and local attention to the impact Alzheimer's and other Dementias have on the community; to utilize the power of the pulpit to bring awareness; and to support persons living with the disease and their caregivers.

RSVP required. Please contact:
Patricia McCormack at 617-635-3992 |
